

# No Idling Banner Competition

We need you to design a poster that can be used on a banner to stop cars idling outside your school.

**Say NO<sub>2</sub> to pollution**

## What is Idling?

Idling means leaving your vehicle's engine running while the car is not moving, which releases harmful nitrogen dioxide gas and tiny particles into the air.

Air pollution is bad for your health as it affects your lungs, heart, and your brain.

To enter the competition...

The My Journey Team would like you to produce a design that can be used on an anti-idling banner to be displayed outside your school.

The aim of your design is to persuade all car drivers to turn their engines off when they aren't moving resulting in less air pollution!

- Make sure your design is large as it needs to be seen from far away.
- Use bright colours and text wisely.
- Your design must include a slogan. For example 'Say NO<sub>2</sub> to pollution' or 'Turn your key, be idle free'.
- It must be A3 so it's big enough to use on the banner. Please use the template provided! These can be collected from the school office.

Please return your completed banner to school by Tuesday 21<sup>st</sup> February.
